PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building backend services, full-stack applications, and production web automation. Strong in Python, Java, PHP, REST APIs, Laravel, Spring Boot, Selenium, Playwright, Shopify integrations, and AWS (EC2, S3). Known for shipping reliable features, fixing production issues, writing maintainable automation, and working independently with remote product, vendor, and operations teams.

TECHNICAL SKILLS

Languages: Python, Java, PHP, JavaScript, TypeScript, SQL

Backend & APIs: Node.js, Express, Laravel, Spring Boot, Flask, REST APIs, JWT, OAuth 2.0, Webhooks

Web Automation & Testing: Selenium, Playwright, browser automation, test flows, debugging

Frontend & Mobile: React, TypeScript, Tailwind CSS, Angular, HTML, CSS, Flutter, Android Studio

Databases: MySQL, PostgreSQL, MongoDB, Firebase, SQLite

Cloud & Tools: AWS EC2, AWS S3, Docker, Nginx, Git, GitHub, Heroku, Agile

Integrations: Shopify, Stripe, MyFatoorah, third-party APIs, payment gateways

Machine Learning: TensorFlow, Pandas, NumPy, NLP, OpenCV, Scikit-learn

PROFESSIONAL EXPERIENCE

Web Automation Engineer

11/2025 – Present

Elyson BPO | Melbourne, Australia | Full-Time

- Built and maintained production browser automation using Python, Selenium, and Playwright to complete repetitive web workflows with less manual effort.
- Created reusable Python and JavaScript/TypeScript automation scripts with stable selectors, waits, validation, and error handling for changing websites.
- Investigated flaky tests, website changes, and data issues; improved logging and test flows so failures were easier to find and fix.

Backend Developer

01/2026 – Present

Scroll | Kuwait | Part-Time, Remote

- Built and deployed Shopify order sync with OAuth, webhooks, and a vendor Integrations UI so orders moved reliably from Shopify into the logistics platform.
- Designed and shipped Proof of Delivery end to end: customer signature, delivery photos, AWS S3 storage, vendor/admin viewing, and a per-vendor toggle to require or skip signature collection.
- Owned AWS EC2 production delivery for a Laravel platform covering driver APIs, admin settings, role permissions, and test data for live mobile duty and order flows.
- Fixed production order visibility and PII issues so synced orders appeared correctly in admin and vendor portals.

Full-Stack Developer

12/2024 – 11/2025

SkyMax Solutions | Negombo, Sri Lanka

- Developed and maintained web and mobile applications with Angular, Spring Boot, Flutter, and Firebase, improving performance and cross-platform compatibility.
- Implemented REST APIs and real-time data features for e-commerce and service platforms, improving system responsiveness and user experience.
- Integrated machine learning models for personalized recommendations and prediction features that supported more data-driven product decisions.

Back-End Developer

10/2023 – 05/2024

Megabliss Worldwide | Auckland, New Zealand

- Integrated the Stripe payment gateway into a mobile application, reducing abandoned carts by 20% through a smoother checkout flow.
- Designed and delivered a bill-splitting feature that supports transactions among up to 10 users, increasing engagement and user satisfaction.
- Worked in an Agile team to ship backend features on time with a focus on scalability and performance.

Full-Stack Software Developer

04/2021 – 06/2023

ICT OPTION

- Built REST APIs for real-time data exchange with an Angular frontend and improved response speed by 40% through optimized query handling.
- Developed and deployed mobile applications with deep learning features for richer user experiences.

Freelance Software Developer

10/2021 – Present

Independent | Remote

- Delivered end-to-end web and mobile applications, covering frontend interfaces, backend services, and client communication.
- Built machine learning models for data analysis, pattern recognition, and intelligent automation under tight deadlines.

SELECTED PROJECTS

Logistics Delivery Platform (NSD / TryVengo) | Laravel, MySQL, AWS, REST APIs, Shopify, Flutter

- Built Shopify order sync and Proof of Delivery (signature + photo) with per-vendor controls, and supported driver/admin delivery flows including MyFatoorah payment-link handling on AWS. Live: admin.nsdkw.com

Sakura Global Cleaning Services Website | React, Node.js, Express, MySQL

- Built and deployed a full-stack commercial cleaning website with service pages, contact inquiries, admin content management, and SEO, hosted on Contabo with Nginx and SSL. Live: sakuraglobal.com.au

Omaru Farm Website | React, TypeScript, Node.js, Express, MySQL, Stripe

- Built a full farm e-commerce and booking platform with Stripe payments, customer accounts, admin CMS, refunds, AusPost shipping, WhatsApp enquiries, and Contabo deployment. Live: omarufarms.com.au

REST API for a Cleaning Mobile Application | PHP, MySQL, JWT

- Built a REST API with JWT authentication and optimized SQL queries, improving API response times by 25%. GitHub: github.com/ashmhmd25321/php_restAPI

Role-Based E-Commerce Website | Java, Spring Boot, MySQL

- Developed an MVC e-commerce platform with product management, dashboards, and authentication for admin, seller, and buyer roles. GitHub: github.com/ashmhmd25321/EcommerceWebWithSpringBoot

Travel Landmark Detection App with NLP Chatbot | Flutter, NLP, Firebase

- Built an image-recognition travel app and NLP chatbot for Sri Lankan landmarks, deployed on Firebase and Heroku. GitHub: github.com/ashmhmd25321/Pocket_Guide_Travel_App

Chronic Disease Risk App | Flutter, Flask, AWS EC2

- Analyzed gyroscope and accelerometer data with AWS-hosted ML models and real-time heart-rate forecasting. GitHub: github.com/ashmhmd25321/Chrono_APP

EDUCATION

BSc in Software Engineering

2023

Cardiff Metropolitan University | Second Upper Class

Higher Diploma in Software Engineering

2019

ICBT Campus | Second Upper Class

Diploma in English

ESOFT Metro Campus | 2015

Diploma in IT with E-Commerce

ESOFT Metro Campus | 2015
